## WORK EXPERIENCE

### DealerCenter Digital

Software Engineer / Frontend Lead

Landshut, Germany

Sep 2020 - Jan 2026

BikeCenter is an Electron-based point-of-sale application used by hundreds of bike rental locations across Germany. Joined as a junior and grew into a frontend lead role, owning architecture decisions, managing frontend priorities, and mentoring newer team members.

- Led frontend architecture for BikeCenter (Electron/React application), building and maintaining its custom design system
- Led large-scale framework migrations affecting 1600+ files (Redux → TanStack Query, React Router → TanStack Start)
- Mentored junior developers and established & documented frontend coding standards
- Architected modern GraphQL-based Vendure storefront and coordinated between design and backend teams
- Implemented component testing with Jest and Storybook snapshots
- Integrated external services including analytics (Mixpanel), leasing calculators, and third-party product advisers

React | TypeScript | SCSS | Storybook | TanStack Router | TanStack Query | TanStack Form | Redux | GraphQL | Tailwind  
Electron | Node.js

## diva-e Junior Frontend Developer

Munich, Germany  
Mar 2020 - Sep 2020

Contributed to a major e-commerce platform and built an internal social platform using React, GraphQL (Apollo), and SCSS. Moved to DealerCenter Digital for an opportunity better aligned with personal goals.

React | TypeScript | SCSS | Node.js

## Campusdus Intern

Landshut, Germany  
Dec 2019 - Feb 2020

Built a fullstack accessories ordering application from scratch – design, architecture, backend, and frontend – during a 3-month internship at DealerCenter Digital's sister company.

React | Node.js

## SIDE PROJECTS

### Black Atom Industries *Open Source Theming System • Creator & Maintainer*

- Created theming system supporting 27+ themes across 6 platforms (Zed, WezTerm, Alacritty, Ghostt)
- Built with TypeScript, featuring automated theme generation and distribution

### AWDCS *Modal Editor Keymap Architecture*

- Designed scope-based keymap system (App, Workspace, Document, Change, Symbol) for modal editors
- Created systematic prefix patterns and semantic naming for consistent, memorable keybindings

### kōyō *QMK Keyboard Layout & Firmware*

- Custom QMK layout for 36-key split keyboards (Moonlander, Corne) with vim-inspired navigation
- Built comprehensive CLI tooling for keyboard configuration and deployment

## PRIOR PROFESSIONAL EXPERIENCE

**Event Technology & Audio Engineering (2011-2019)** Extensive background in event technology, professional sound engineering, and photography. Worked at five-star hotels and premium studios, developing strong problem-solving and client communication skills.

**Education:** Sound Engineering & Mastering, Deutsche Pop Munich (2010-2011)

## INTERESTS

Hiking, Running, Bouldering, Cooking, Reading, Photography, Design & Architecture
